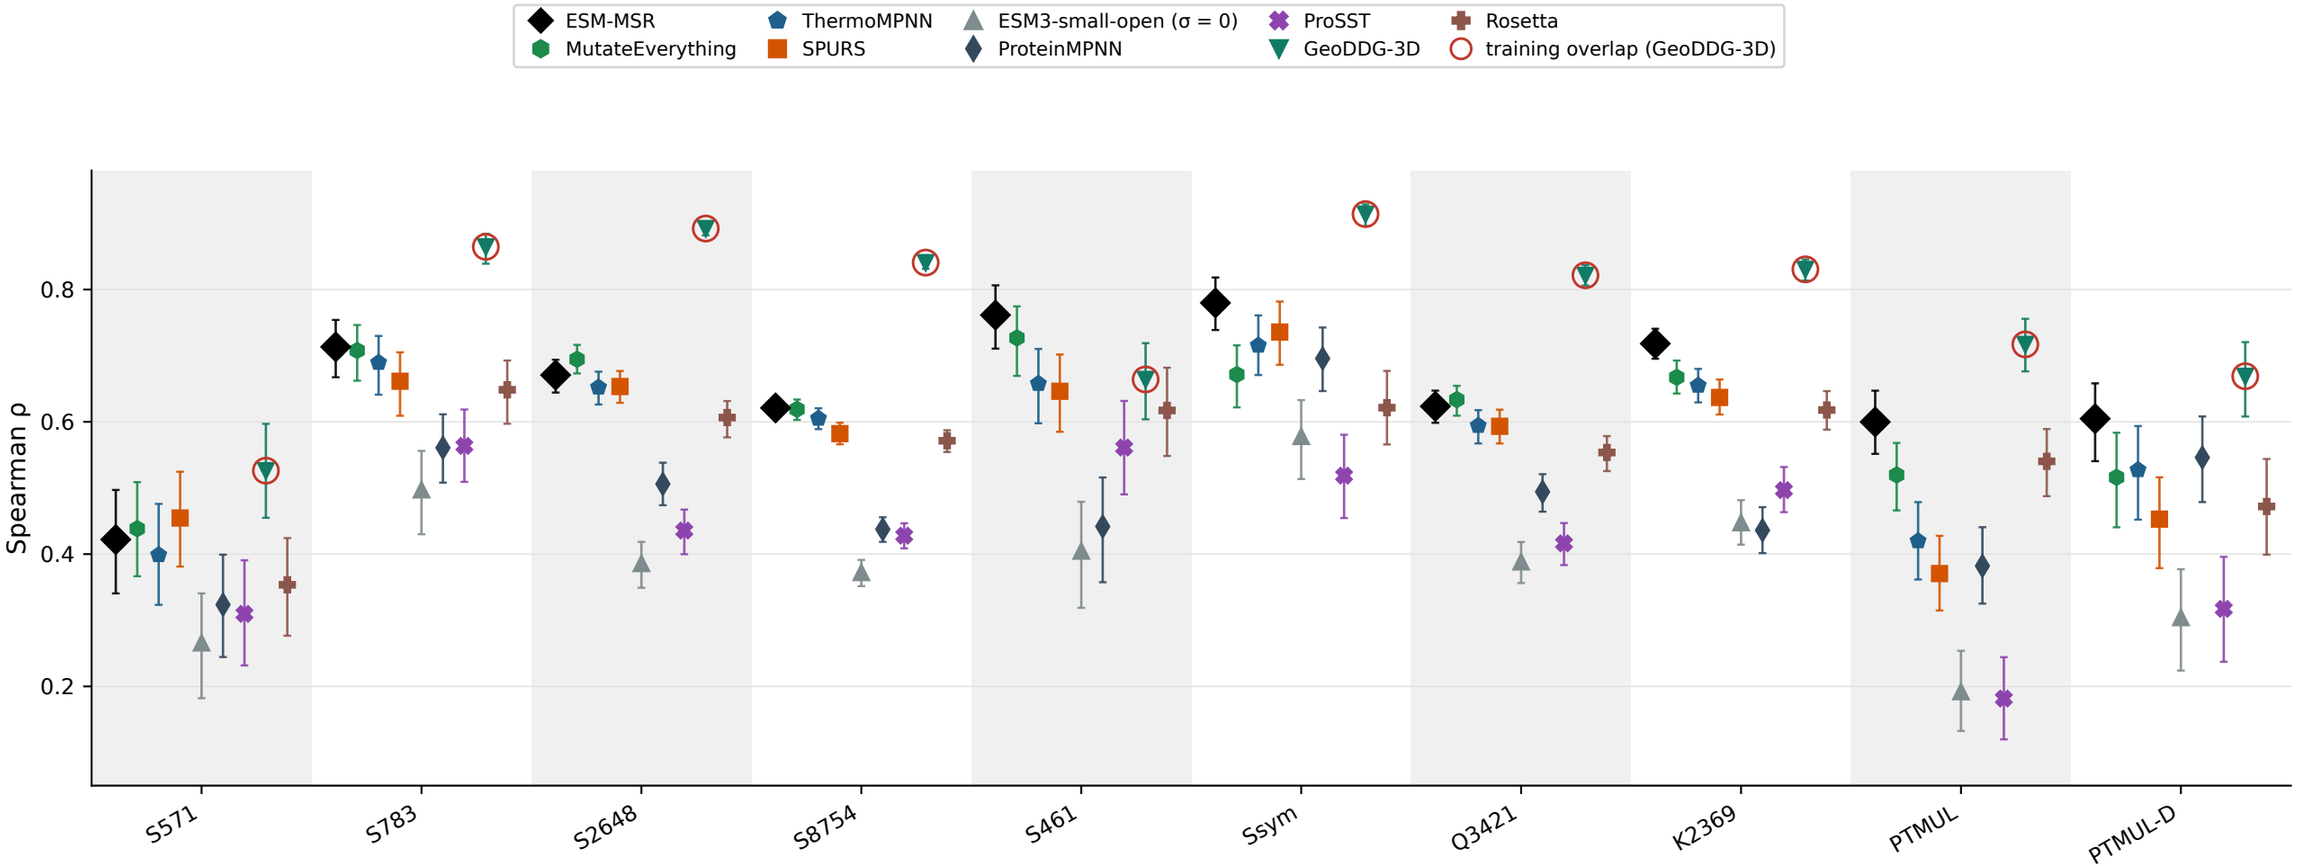
External thermostability sets: Spearman ρ across all models (seed 1; whiskers: 95% mutation-level bootstrap)



Seed 1 only; 95% mutation-level bootstrap. Singles models on the 8 single-mutant sets; multi models on PTMUL/PTMUL-D (ThermoMPNN additive on PTMUL, -D on PTMUL-D; Rosetta Cartesian ddG throughout). Red ring = GeoDDG-3D documented training overlap.
