Spearman ρ on external benchmarks, one replicate per model; SPURS excluded (training overlap).
Error bars: 95% bootstrap CI over proteins (B=10000): ESM-MSR σ=1 (black), σ=0.5 (grey, where tested), next-best model.
Stars: ESM-MSR better than next-best, one-sided paired bootstrap, Bonferroni within family (* p<0.05, ** p<0.01, *** p<0.001; σ=1 top row, σ=0.5 second row).
Protein-level bootstrap is undefined for single-protein datasets.
